BUILT ON EXPERIENCE

Softline/Slimline/Frontline shelving systems are the culmination of years of experience and success

This flexible product concept has evolved over the years and its modular structure and large number of standard components ensure ideal room utilisation and intuitive accommodation of all relevant functions. In addition, the flexibility of the system allows for a variety of tailored solutions. Our design team is always ready to offer advice on functionality, furnishing and design.

For more product details and technical specifications on our standard offerings, please refer to our website www.wearelibrarypeople.com.

THREE SHELVING SYSTEMS – THREE DESIGN EXPRESSIONS

Softline, Slimline and Frontline shelving systems are all based on the same module structure. The main difference between the three systems is the design expression.

SOFTLINE
Softline comes with a 25 mm super elliptical shaped edging of solid wood. The distance between the front edge of the end panel and the front edge of the shelf is 26 mm.

Softline shelving system is delivered as standard with 22 mm thick end panels in light steamed beech veneer or birch veneer or in painted particleboard in any NCS or RAL colour.

SLIMLINE
Slimline comes with a 4 mm flat front edge of solid wood. The distance between the front edge of the end panel and the front edge of the shelf is 26 mm.

Slimline shelving system is delivered as standard with 22 mm thick end panels in light steamed beech veneer or birch veneer or in painted particleboard in any NCS or RAL colour.

FRONTLINE
Frontline end panel has a 4 mm flat front edge of solid wood. The distance between the front edge of the end panel and the front edge of the shelf is 5 mm.

Frontline is available in two standard versions with either 22 or 38 mm thick end panels. Top and bottom shelf for Frontline 38 is delivered as standard in 38 mm.

Frontline shelving system is delivered as standard in light steamed beech veneer or birch veneer or in painted particleboard in any NCS or RAL colour.

FACTS

Product details

All three types of the shelving systems are available as single- and double-sided in a variety of standard heights, depths and widths. Use either a steel frame or wooden back panel to support the shelving, this makes it easy to add or remove shelving bays without dissambling the other bays. The shelving systems are easy to assemble and no special tools or expert assistance is required.

For the shelving systems we offer a wide range of functions: shelves for backedge book supports, shelves with hanging book supports, sloping shelves, corner shelves, magazine- and mulitmedia solutions, cabinets, browsers, castors and end panels with e.g. display option. In addition, we offer different kinds of lighting (shelves, top, LED etc.). By adding one or more of these functions it is possible to create a tailored shelving system that fits your library's specific needs.

SHELVES

- Horizontal and sloping
- Wood and steel
- With and without backedge

PANELS

- End panels in wood
- Display end panels in wood
- Steel back frame or wooden back panels (veneer, painted or melamine)

ACCESSORIES

- Castors
- Signage
